

Creating my Nearpod presentation

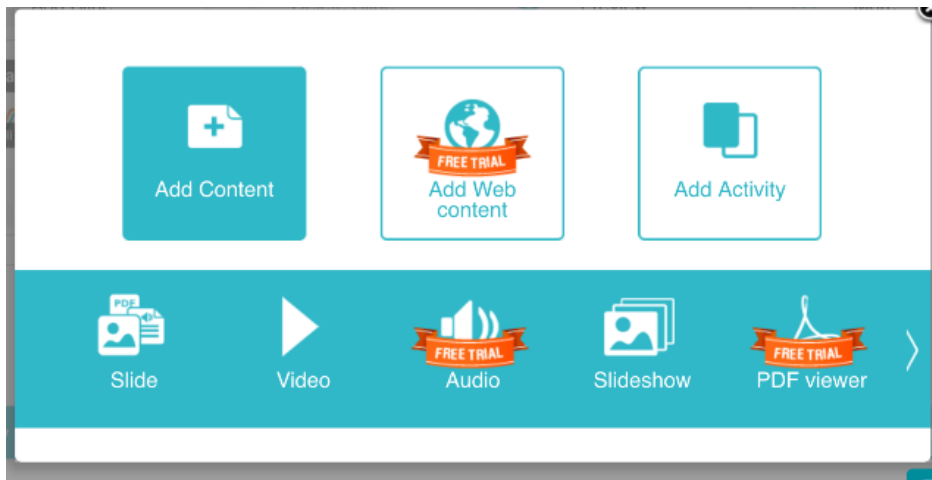

1. First, I created my lesson as a PowerPoint presentation and saved it in my lessons folder as a PDF file.
2. I logged onto my Nearpod account to create a new Nearpod presentation.

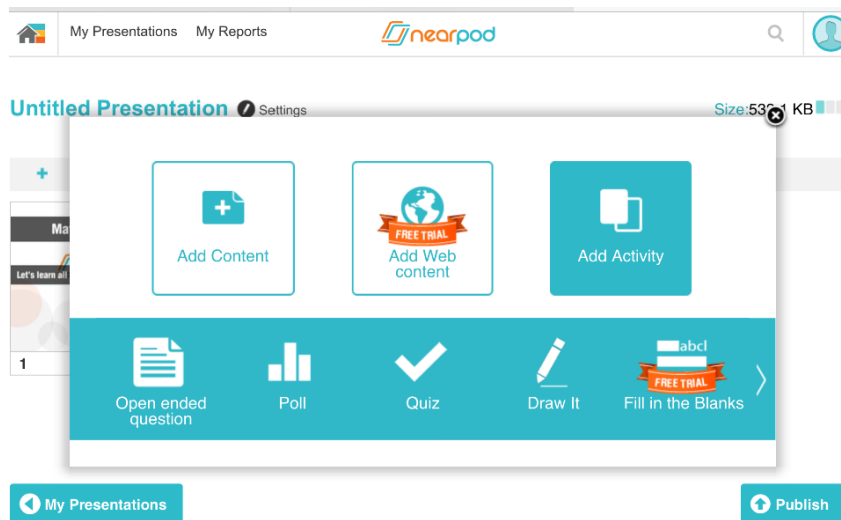

3. I selected the previously created lesson in PDF format and dragged it into my Nearpod presentation.

4. I added content to your Nearpod presentation (tap 'add slide'. Then, tap 'add content'. The content that you can add to your slide includes: a new slide, a video, or a slide show).

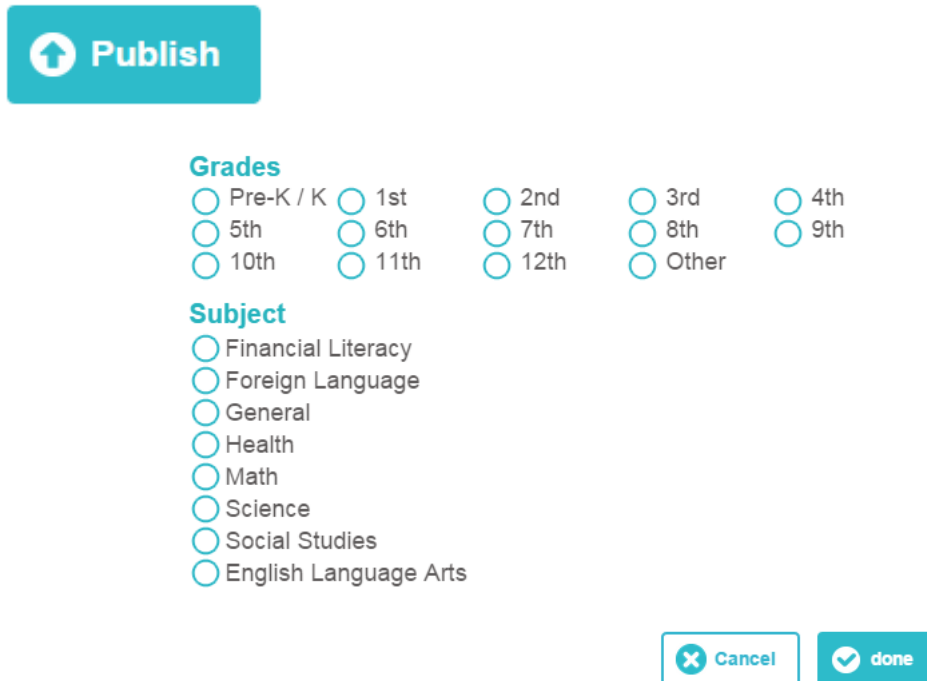

- 5. I added an activity to my Nearpod presentation (tap 'add slide'. Then, tap 'add activity. The activities that you can add to your slide include: open ended question, poll, quiz, and a draw-it response).

When adding a Q&A, Quiz, or Poll, type your question into the question box, and then add all of the answer options. Indicate the correct answer (Note: Polls do not require indicating a correct answer) by clicking on the check mark to the right of the answer.

6. After creating my Nearpod presentation, I published it to make it accessible by my students (with a PIN provided) and others can search for it if they are using Nearpod as well.

7. To share the link of your Nearpod presentation select the home button from the upper left corner. From there, tap the 'My Library' section. Then, select the presentation that you would like to share. On a desktop computer, scroll to the bottom where the sharing options will be located. On an iPad, tap the 'Homework' button to locate the sharing options.
